

The value of having multiple members in a family concurrently receive homeopathic treatment cannot be understated. I truly believe the more people receiving good constitutional homeopathic care, the better off everyone in the family will be. With that in mind, I'd like to offer the following family plan options to help encourage more members in your family to enjoy the health benefits of homeopathy!

The basic structure is first for each family member complete their Initial Consultation to establish care. Then, each person will have "Regular Follow-Up Consultations" occur at 4-8 week intervals up to a period of approximately six months, which can then be renewed. Rates for consultations decrease when more members of a family are participating. See below for further details.
